
Text Image Generator Crack Download For Windows (Latest)

Text Image Generator is a software tool that will make any text image a lot easier to create. Text Image Generator is a simple tool that does exactly what its name states. It is a program that will allow you to create a custom image based on the text that you can type in. You do not have to be a programmer to create a custom image, so the Text Image Generator is ideal for

beginners. The Software is mainly for creating small images that you would like to share, or even better, text images on social media, like Facebook, Twitter, Google+, etc. The text image generator will do all of the hard work for you, and you can even choose a custom text for the image. You can create custom images based on your favorite animal, say your favorite sports team, or a picture of something funny

or cute you have found. No matter what it is, you will be able to create a customized text image. You do not need any special software to create a custom image, or any programming skills at all, the Text Image Generator will do all of the hard work for you. It will allow you to create images with text based on a font of your choosing. You can create images for Facebook, Facebook Messenger, Twitter,

Google+, etc. There is no limit to how many text images you can create, you can create as many images as you want. A few of the features of Text Image Generator include: - Custom Text: The Text Image Generator has a built in option that allows you to create text images with a custom text that you can enter. This can be anything that you want, your favorite sports team, a picture of your

favorite animal, your favorite cat, your favorite singer, etc. You can also use the Text Image Generator to create text images based on a picture that you have saved in your computer. - Background Color: The Text Image Generator will allow you to choose a background color. You can choose a solid color or a pattern. The pattern can be a solid color, a gradient, or a hatch. - Save: You will be able to save the image to the

desktop or your hard drive. You can also save the image to JPEG, PNG, or BMP format. - Preview: The preview option will allow you to see the image that you are about to create. This is important for when you are creating text images, so you can see what the image looks like and how it will look when you are done

Text Image Generator X64

* This program is extremely

easy to use * The interface is very intuitive and user-friendly * Easy and efficient * No more complicated software like Photoshop or GIMP * It generates the images in one click, without any human interference * Its function makes it unique among similar software programs

Keywords 1.30 Text Image Generator is a lightweight software application built specifically for helping you create images with user-defined text messages and background colors. It sports a clean and intuitive working environment that allows you to configure the editing parameters with minimum effort. The program gives you the possibility to type in

the text in a dedicated panel or paste it from other third-party utilities, and customize the text in terms of font, font style, size, and color. Plus, you can select between a solid, gradient, or hatch pattern. What's more, you are allowed to pick the background color, and save the image to PNG, BMP, or JPG file format.

Additionally, Text Image Generator offers support for a previewing function which

lets you analyze each editing step. In order to save the photo to the computer, you are required to choose a filename and saving directory. Since it doesn't require much computer knowledge to set up the dedicated parameters, even rookies can master the entire process with just a few clicks. During our testing we have noticed that Text Image Generator carries out a task very quickly, provides good

image quality, and no errors showed up throughout the entire process. It doesn't stress up the CPU and memory, so the overall performance of the computer is not hampered. As a conclusion, Text Image Generator offers a simple yet efficient software solution when it comes to helping you create images from scratch using custom messages and colors. It can be easily installed and configured by

all types of users, regardless of their experience level.

KEYMACRO Description:

Text Image Generator is a lightweight software application built specifically for helping you create images with user-defined text messages and background colors. It sports a clean and intuitive working environment that allows you to configure the editing parameters with minimum effort. The program gives

you the possibility to type in the text in a dedicated panel or paste it from other third-party utilities, and customize the text in terms of font, font style, size, and color. Plus, you can select between a solid, gradient, or hatch pattern. What's more, you are allowed to pick the background color, and save the image to PNG, BMP, or JPG file format.

Additionally, Text Image Generator offers support for

a previewing function which lets you analyze each editing step. In order to save the photo to the computer, you are required to choose a filename and saving directory. Since it
