You can download the app and explore the features by clicking on the image below: Check out our full review of AirMount application: We know this is kinda similar to a line of questions we've asked in the past but we wanted to give this a special tag because the previous Stack Overflow question: Synchronize music on android and pc ...made this question look familiar enough for us to include it in here. A: Wondershare Media Go Video Player ( is one of the few apps you can buy. Wondershare Media Go Video Player is a powerful media player for Android, PC, and other devices. It has a simple and quick interface, and it allows you to convert and play local and online video and audio files. You can import and play local video files. This features can convert video files to play on Android devices and PC. You can also play online video and audio files through a web browser. #pragma once #include

AirMount is a powerful and productive application that allows you to transfer content between your iOS devices and your PC. It's a handy app that enables you to more easily share content (like photos, videos or documents) between the two devices. Regardless of whether the content you want to transfer is smaller in size like photos or videos or larger in file size like documents or projects, you can do so with AirMount. Also you can easily grab the content you have shared from the app. AirMount Features: - Intuitive Pairing: Pairing process is hassle-free. You just need to enable pairing, and the process will be done automatically. - Well-Designed interface: It's designed in a simple, yet intuitive way, making it an easy to use, yet powerful application. - Ability to share content via Wi-Fi: You can download content to the app's folder on the PC. And, it also allows you to share the same content directly to your iOS device via Wi-Fi - Supports Universal Copy: Share content in a much better way, which is faster than having to transfer the file with iTunes or the like. - Supports File Attachments: You can transfer content to/from iPhone and iPad. - Supports Document Content: Share content from virtually all documents including Word, PowerPoint, PowerPoint, Excel, PDF and other formats. - Supports Media Attachments: Transfer content from most of the photos, videos and music you have. - Supports Multimedia: AirMount enables you to share and manage files that contain music, video or photos directly from your computer. - Supports Sharing of Images: Share photos directly from the Photos app in your iOS device. - Supports "Browse in Windows Explorer" mode: Easily start a file from Windows Explorer. And, very intuitively transfer files to/from iOS device, via Wi-Fi, camera or cable. - Supports Devices that support "Wireless Sharing": You can share your iPhone, iPad or iPod touch wirelessly to your computer. And, with AirMount you can install the app to Wi-Fi network, get rid of the IP restrictions. - Supports Transfers on Mac/iPad/iPod: AirMount allows you to transfer your files to Mac/iPad and iPod. AirMount Requirements: - For Mac only: AirMount requires Mac OS X 10.7 or later. - For PC only: AirMount requires Windows Vista 09e8f5149f

AirMount is a cross-platform application that enables you to transfer content between your computer and iOS devices by seamlessly integrating with the Windows Explorer and the taskbar. Once AirMount is installed on both computers and mobile devices, transferring content to and from is a breeze. AirMount Features: - Works seamlessly with Windows Explorer and the taskbar - Allows you to manage all your content - Supports all iOS devices (iPhone, iPad, iPod Touch) - Allows you to share content easily between your iOS devices - Allows you to quickly transfer content to and from between your computer and iOS devices - Transfer content from a single or multiple Windows Explorer instances (2 and 4 window modes supported) - Transfer content from a network shared folder or UNC path - Supports the drag and drop of content between Windows Explorer and all iOS devices - Supports browsing and manipulating of files and folders directly from an instance of Windows Explorer - Supports drag and drop of content between 2 instances of Windows Explorer - Allows you to preview content from any iOS device on your computer - Allows you to more easily sync and share content between iOS devices - Allows you to access and modify your iCloud account from Windows Explorer - Allows you to toggle the "Launch on system startup" feature on or off

**AirMount Sideload Description:** While AirMount seamlessly integrates with Windows Explorer and the taskbar to make content sharing between your computer and iOS devices super easy, we also have a Sideload option for you to use.

**AirMount X Description:** AirMount X is an open-source app that seamlessly integrates with Windows Explorer and the taskbar to make content sharing between your computer and iOS devices super easy. It also offers you a powerful, streamlined, content-managing, sharing, and syncing feature set by nature. This app is fully compatible with Windows 7, 8 and 10 operating systems.

**iDrive-to-Itunes Description:** iDrive-to-Itunes is an application designed to help iTunes users to link their iDevices with iTunes and it allows to backup and restore those iDevices to iTunes. It can help you solve several problems, such as not being able to launch iOS apps directly after import from iDrive, iTunes error 1301 when adding content from iDrive to iTunes, or iTunes error 1324.

**iDrive-to-Itunes Features:** - Supports

#### What's New In AirMount?

AirMount has been developed with the objective of making it easier to share content between your iOS devices and your computer. Easy, smooth, fast, and direct is the functionality of your hard drive.

**Features:** 1- Drag-and-drop content straight from iOS to your PC. 2- Transfer music, video, photos, and other media to your PC or Mac. 3- Support for music, photos, documents, and videos. 4- Support for over 50 iOS devices and Mac (MAC OS X) 5- Send SMS or Email 6- Supports all iOS devices running iOS 5 and above 7- Free to use 8- Easy to use 9- Fast speed 10- Intuitive

**AirMount Requirements:** AirMount works with all Windows operating systems (Windows XP/Vista/7/8). Mac OS X 10.7.5 and later is not supported.

**AirMount Components:** AirMount is able to transfer files to and from your iOS device or computer via Wi-Fi or USB. It can also synchronize content from an iPad, iPhone, or iPod touch directly to your computer and/or Mac with the use of iTunes. AirMount components are comprised of:

- AirMount iOS & Windows companion app.
- Windows Explorer.
- ImageMagick (available on Windows XP/Vista/7 and Mac OS X, 10.6.4 and above).

These components are stored in one folder on your computer, so to remove them you need to delete that folder. In fact, you can remove all the components from your hard drive: open the AirMount folder (located on your computer), delete all the files (based on the date format), and don't forget to delete the AirMount folder itself.

**How to Install AirMount on Mac OS X:** Open the AirMount.app file on your Mac OS X. Then click on the icon and allow the app. Once this is done, the app will start downloading. When the installation is finished, open the folder containing the AirMount.app file. Now, move the App's icon from the Applications folder and drop it into the Dock. This will enable you to start AirMount from the Dock on your Mac.

**How to Install AirMount on Windows:** Open the AirMount.exe file on your Windows 7/8/8.1/10. Click Run and allow the app. Once this is done

**Minimum: OS: Windows 7/8.1/10 Processor: Dual-core CPU 2.0 GHz or faster Memory: 3 GB RAM Graphics: DirectX 11 graphics device with WDDM 1.0 DirectX: Version 9.0 Network: Broadband Internet connection Storage: At least 6 GB available space Recommended: OS: Windows 10 Processor: Quad-core CPU 3.0 GHz or faster Memory: 4 GB RAM Graphics: DirectX 11**
