What's New In?

ShazzleMail is an application that allows you to transform your iPhone or Android mobile device into a secure and reliable server for sending and receiving emails. shazzle is the fastest and easiest to use secure email app for the iPhone and iPad. It allows you to store, secure, share and receive private and secure emails. Do you remember those days when you used to do all of your important work on a computer, then you had to transfer all of your files and emails to the iPhone and iPod to make sure that they were safe and sound? With shazzle you can do all of this on the go from your iPhone or iPad without worrying about losing your files. Now all of your email is safe and sound on your iPad or iPhone, and you can just use it on the go or even access it when you are on the computer. Here is how shazzle works: 1) You sync your emails with our secure email server and download them to the cloud. 2) You have a secure and private inbox on your mobile device 3) Whenever you get a new email, it is pushed to your device via our secure, private server. 4) When you check your email in the app, you access it securely, privately, and securely from your device. 5) You can share your email with other users and computers.
