1) ERAM is easy to use, just enter your filename, path or folder and click "Start" to scan your entire system. 2) ERAM supports reading and writing and does not require any special drivers. 3) You can create as many ERAM volumes as you wish; each volume can be saved or opened at any time. 4) You can set ERAM to delete your volumes after a certain period of time. 5) Each volume can be named, and ERAM will find the corresponding volume automatically. 6) ERAM can be run as administrator without any problems. 7) ERAM can be installed in all programs: Start menu, Task manager and Registry. 8) In order to use ERAM, you do not need to register and you can save your settings so that you can access the program anytime. 9) Since ERAM is based on USB (Universal Serial Bus) interface, you can connect your ERAM from any PC without any problems. Q: using multiple axios call and merge values i have 3 axios.post call to data.php. I would like to merge the results of the 3rd axios.post call into the 2nd axios.post call. this is my main call : this.http.post('data.php',{paymentType:payType,carItems:carItems}) this is the 2nd call : this.http.post('data.php',{type:"paymentType",carItems:carItems}) I would like to merge the data.php return values of the first call and the second call. \$("\${payment-type").html(data.php); \$("\${payment-id").html(data.php); this is the result i would like to obtain : \$("\${payment-type").html(data.php); \$("\${payment-id").html(data.php); i could simply use axios.all() to merge the axios.post call results but i would like to avoid duplicating all the data from the axios call inside my Vue.js app. is there a way to do this? A: this.http.post('data.php',{paymentType:payType,carItems:carItems})
