War games are a good place for strategy games. Add real time strategy elements, and you have a great game. Graphics were amazing for me. It reminded me of MS Windows 98 and it was weird. I never played games on PC before, but I was at a friends house playing this game. It took me 10 minutes to set up the game and start playing. Ever since I started playing, I have not stopped. If you like strategy games, you will like this game. If you want to play it on easy, it is easy. If you want to play it on normal, it is normal. If you want to play it on hard, it is hard. If you want to play it on insane, it is insane. The controls were easy to play and controls were mapped to a keyboard. There is a skirmish map, where you can play with many other players. There is some feature where you can "play the map" as a chat, which tells you which way is the best to play. There is also a map editor. The map editor is okay, but

you have to know exactly how it works to use it. I recommend this game to people who likes strategy games, and who like Windows 98. Is it any good? Great strategy game. Controls were easy to use. A very fun game. Features Graphics were great. Full version Yes, there is a full version of this game. Sound I'm not gonna rate this because there wasn't any sound. Lasting Appeal 4/10 - Has a short single player game, but the map editor, etc. may keep you playing it after you beat the single player game. A strategy game that is played on a server to compete with other people. The map editor looks great, and there is a map editor built in. Story What is the story about, you may ask? Well there is no story, really. Gameplay This game is only a map editor. Graphics The graphics were amazing for me. Controls You have a keyboard that you can use. Overall 7/10 - It was fun, for the 5 minutes I played. Review "I normally wouldn't rate games anymore than a 3 but I love this for some reason. I suppose I just like simple and easy. I usually don't like games that people spend hours in because of spending so much time in them
