An unprecedented action-RPG experience where players have direct control of the brave heroes. The game is totally faithful and genuine remake of the classic space opera game "Unforgiving Trials" and is made for fans of the genre. About The GameUnforgiving Trials: The Space CrusadeAmerican experimental artist David A. Miller (1955 -) founded Project Mayhem in 2004 with the stated objective of making insane, blatantly cynical (and sometimes funny) political satire. The manifesto accompanying the initial announcement of the project reads, in part, "Project Mayhem is a form of large scale satirical prank, equivalent in some ways to Dennis Miller's Miller's Show on Fox, a regular joke program created in the early 1970's." Miller also claims to have been influenced by the "murderabilia" graffiti left by some of the APO7 Gang in the early 1970s. The face of the Project Mayhem manifesto has a decidedly 1960s counter-culture flavor, however, while the lettering used is partially stenciled like a typical street artist of the time. Miller's first project, entitled "CLOSE VISION" (and the name of the site itself) was a mock "pissing contest" in which participants were encouraged to vote for the weakest candidate in order to determine who could best occupy the White House. The 2000 work "Twenty-second Amendment" was an effort to enlist the help of political figures who were about to be elected to public office to prevent a second Clinton presidency. Ironically, then-President Clinton signed off on the project before being inaugurated. Project Mayhem's first major public execution was the 2004 "Chump Edition", a humorous effort to get a "chump" Democrat elected president. The project consisted of posters featuring several important and very real Democrat politicians (among them, Bill Clinton, Al Gore, John Kerry, and John Edwards) accepting money from convicted terrorist financier Khalid Sheikh Mohammed. The posters were then mailed to individual U.S. voters. While several of the recipients did end up voting for Democrat candidates, the obvious and intentional "joke" was that none of them were actually Republicans. The Project Mayhem letters (in fact, most Project Mayhem works) are printed on official government stationery, and are only circulated within legal electoral cycles. Other works include a satirical attack on the U.S. military in "Afghanistan 2004", a rendition of the human genome printed on a penny (featuring what amounts to a complete opposition party slogan), and "Martin Luther

What's new:

Latest Stories The first time **Big Cock Andy** walked into a tattoo parlor to buy a new chest tattoo he was 18-years-old and broke. He had never had a tattoo before and he was broke and desperate. He showed up late at night and asked for 600 bucks for a new tattoo. Nacho Vidal is the worst dancer from his primary school and he's fucking made his best friend cum on friday night. Tai is a Chinese girl who works in a local factory in Birmingham. She's an attractive, young and comes from a traditional Chinese family. When she goes home she is never left home alone because her mother is in the shop all the time and then you start to get a little nervous that she never gets out. Her husband comes home from work and gets furious that she isn't busy so he gets out the belt and starts beating her. The power of letting go releasing emotion, mate that's touching, it's an effective way of making love to the poopier emotion, the more crap you can release the more you're suppressing that emotion. But it's also important to let shit go because the more you hold onto shit the more it just ends up piling up to be kind of draining and it can become a bit annoying because you're so frustrated with it. Michael is some good head, for a so-called red-blooded American boy. But he doesn't do PIV... well maybe a little bit sometimes. Sebastian Santiago has got a big sausage, it sits erect like an animal in the hot, smoky nightclub. With lustful eyes he spies the equally deranged young boy Adam on the dance floor, and smiles. So try this, maybe it'll help you overcome the sparkle monster! Penny, a hunky blonde, has come from Germany to Prague where the club opens until 5am every night. He opened the club only six months ago and hasn't made so much money in six months, so he is really stressed. Suddenly she feels sorry for him and he is smitten, and she kisses him. Man, perhaps he should be the new owner? The kiss lasted longer and her tongue touched his tongue and sucked it in her mouth. He was a little shocked, not having another man's tongue anywhere

This PlayStation Vita game is filled with fan service and fan fiction. The universe of the Neptunia games is well-known by fans worldwide, so we hope to create all the nostalgia that the fans have for the entire series. Also, this is the first Neptunia game to be available on the PlayStation Store. I'm pretty tired of Birth by Sleep. It's just so random that this is where the story is. I mean it's fine if it's random, but why does this make the cut? It had a big thing with the new gameplay and even some of the characters, but it also looked so rushed and not good. Anyway, I hope to get over my hatred by the time the Japanese version comes out. The key is in my hand. I'm pretty tired of Birth by Sleep. It's just so random that this is where the story is. I mean it's fine if it's random, but why does this make the cut? It had a big thing with the new gameplay and even some of the characters, but it also looked so rushed and not good. Anyway, I hope to get over my hatred by the time the Japanese version comes out. The key is in my hand. Yeah, I agree with this. If the developers have seen the backlash to their prior choices, and all of the fans wanted a Birth by Sleep, they should have made Birth by Sleep instead of this. As soon as the PS3's online offerings vanished, I just knew I'd be missing out on some content. Now that the Vita's online offerings are left with the same fate, I'm not so sure. In one of the unofficial entries, they revealed that the online service will be free for the Life DLC. I hope they also add something to how the game saves info online (especially for achievements) so there won't be any awkward situations where you open your PS Vita app and it tells you that you've got absolutely no progress. Any idea on how this will be done? Stopped reading when it said even more people would be added (as in more playable characters). If they're going to add more (even more "fillers") characters that are already playable, I am pissed off. I will not buy any DLC/expansion in this series until they add a way for me to play all the characters I already have in my party!
