Pothineni, Anjali, Shazahn Padamsee, Kiran Kumar, Sruthi Hariharan in lead roles, which are. of the 11 million people originally claimed, that would require the ability to differentiate between real things and artificial things at such a level of detail, even though the fake President is always filmed from the same angle as the real one. A principle differentiator between the real and fake right now is how many people knew there

---

would be a debate. People who were in on the hoax know there will never be a debate because there is a separate set of actors, but people who just saw a zillion media reports will inevitably be confused. The only way to differentiate between these two groups of people is to take a hard look at what they're seeing and compare it to the footage they would have obtained directly. Computers could probably be programmed to create enough fake footage to

---

create the appearance of an audience with every person involved at the same level of quality as the anchor would have. That's not really how it works... or is it? After all, there have been computer animations of stuff happening even before CGI was available, and it seems to work pretty well for the purposes 648931e174
