The family life Joseph Cunningham has had with his family members has been tumultuous, to say the least. His childhood was particularly abnormal. Joseph's parents were a divorced couple who's relationship had been on a steady downward spiral for years, but things had become particularly unstable. When Joseph was born, both of his parents were still married and living together, but a few years later, Joseph's mother, Samantha, left his father and moved into an apartment. After that, Joseph's father and Samantha would have Joseph one day at a time, living together for the day, then apart for the next, before finally deciding to be apart for good. While his father, Leland, struggled to raise Joseph, he tended to his grandmother, who he was required to visit regularly, much to the dismay of her son and stepdaughter, Joanne and Deanna. When Joseph's grandmother died, Joanne had to leave her job at the university to care for her mother. With the two of them living in the same house for the first time, she and Deanna helped take care of Leland's mental health. They were there at the hospital as he became increasingly delusional and was eventually hospitalized for two weeks. Things had only gotten worse for the Cunningham's. The divorce that Joseph's mother had made it through with as a single mother had left her with crippling financial problems. At one point, she was living in a trailer park, relying on social services to care for her child. Then his grandmother died and suddenly, Joseph and his father were living under the same roof again. This time, however, they were living in a state of mutual dislike and hatred towards each other. Leland showed his contempt for Joseph and Joseph was always forced to make small jokes about how awkward he was around Leland, because his father would begin to laugh at everything he said, and his jokes would prove to be no more funny when he was done with his mouth stuffed. Joseph's father rarely raised his son and even less often cared for him. Samantha, on the other hand, showed her affection for Joseph and Joseph was grateful to her for that, even if it was only to keep her company. Even though things weren't always this dire, Joseph was almost always surrounded by turmoil. He dealt with his family because of love and because he could, not because he had to. Until one day... one day, Joseph came home and saw that it wasn't the way it usually was. It was Leland and Samantha in bed together, still married. As Joseph's father

## Mikoshi Features Key:

- The light and dark tension of true psychological tension (no action scenes here).
- Hidden secrets everywhere. No cutscenes/actions scenes in the whole game.
- Dark Zenith engine (99% original) but with many new features. 2D graphics but 2.5D game look.
- The game has a humor surprise. The game is quite serious but it has few hidden gem to amuse players.
- Unique puzzles. I won't judge the puzzles just let the players judge it.
- Eight game endings. Eight endings is indeed possible in the game, and you will never know the true ending. I really want to give players a feeling of "What's next?" (bigunreadable.it/thearchitect) or a feeling of "Oh... I got chewed for a wolf."
- Three game modes each with their own difficulty level.
- Four Unlock System. Players will be able to unlock three worlds on their own that have a certain clue. Once the clue is found, the player is able to access all four game modes on each level.
- Four boss enemy. Once players have unlocked every world, the final boss will be different from the previous boss.
- Save system. One last important issue I want to clarify is the save system. Sometimes players keep on complaining it's hard to find saves. For those who complain, I don't even know the most important items you can find in real life: rucksacks, wallets etc. if you want, I can always recommend you that both the in-game save and cloud save are in your cellphone when the game is running or paused. To those who keep complaining about saving and loading a lot, that's only because the cloudshakedown system is automatic. If there is no cloud save, choose either the social apps like WhatsApp or Wechat or other similar apps, which is often connected to clouds.>

**Download links, SteamKey and PlayKey. I am unsure about what playing on PC I might want to do. If you have Steam account, I recommend you buy the game from Steam. Once done, you can access all of my games and campaigns on your Steam account. If you don't have Steam account, you can still buy the game.**

## Mikoshi [Mac/Win]

The Refuge was a place to repair people. It was a refuge, where beings of many different kinds could be fixed, so that they might be able to carry on with their own lives, the right way. Since the outside world had become a rather dark place, and the people needed repairs more and more every day, a place like this was a blessed thing. But this refuge was under a threat. On the outside world, the sky kept darkening, and the winds kept beating the planet harder and harder. It wouldn't last forever, but it sure seemed to be getting harder every day, until one day, it would be too late. Today, the air was still. This was the day the Refuge would be closed. Its time had come. On the way to the Refuge, he bumped into a young fellow. The young man was a walking cutout of ripped jeans and torn up tee-shirts, showing off his bruised and bloodied knees. His whole body was covered with battle wounds and his eyes were lost, looking through the void. He kept his mind on his knees as if they had a mind of their own, and nothing could be more wrong. "Let me see..." Said the man in the suit, letting the young man step back, while looking at the cuts on his knees. He was a bit shocked to see the boy's knees; the skin of them were all torn and his muscles were so bruised and thin that they couldn't stand the tug of his knees. "Wait." The man went inside the shelter to get something to disinfect his wounds, leaving the boy outside. He thought he could have a few minutes of free time before he was done with his job. He left his bag, and decided to take a walk through the battered landscape, even though he didn't even know where he was heading to. There was something that he wanted to find. As he walked, the whole world was crashing into him. Where the trees used to be, were miles and miles of rolling hills. Once there was a family of three, a mother, a father and a boy. He stood under a tree. Their house was destroyed, its roofless walls crumbling away in the wind. The mother's body, covered in blood, was draped over a broken-down fence. There was nothing they could do, as their other son was dead too. All that

**What's new in Mikoshi:**

's Secret The Immortal's Secret is a 2008 psychological horror film directed by James Wan and co-written by Leigh Whannell and Wan. The film stars Eric Bana, Rob Pattinson, Uma Thurman, Milan and Wallace Langham, and tells the story of an eccentric scientist who is the last of his kind, and pursues immortality for his wife and son. The film was released in the United States on June 15, 2008. Plot The story begins with scientist Michael King (Eric Bana) working on a project, called the Transgenic Growth Stimulation ("T.G.S.") protocol, as research for his graduate thesis. The T.G.S. protocol is a program that affects cells in a living organism, and much like in eugenics, is the only form of medicine that can result in a full genetic makeover and make one's age approximately 10 years younger for ten years. Michael's seemingly successful results are recorded by a group of criminal teenagers, who are carrying out a robbery at the same lab. The experiment results in Mike's body going into shock, and his heart stops. The teens, sporting masks and pants with studs, enter the lab and attempt to steal the T.G.S. experiment. Dr. King narrowly escapes his death by ditching his body in a bathtub with the oxygen removed, and the experiment becomes stalled. He flees the lab in his vehicle with his son Paul (Wallace Langham) in the back seat. The exact nature of a T.G.S. experiment is unknown, and Michael is not sure if he has the means of reviving Paul. After Paul picks up a police uniform from a policeman, Michael then snatches a black satanic mask from an evil-looking man at a gas station, and drives to the nearby town of Rushville. As Michael is about to be pulled over for speeding, Paul gets kidnapped by the mask-wearing man. Michael tries to focus on getting Paul back, but cannot, as he and his son are also victims of a bungled experiment. Michael and Paul wake up in the same lab as before, this time with no memory about who or what they are. They find an adult version of Paul is also with them. The adult Paul is scared, and he now looks like Michael. The adult Paul informs them that there are three others with them, who are being controlled by the thugs who tried to

**Lag Fix:** Need is to reduce the jittering on the screen between the mouse and the shots. You can do this by adjusting Valve Anti-Lag setting. With the following VAC Status (0 = off, 1 = disabled, 2 = enabled) can be seen on the screen which also provides visual information about an optimal setting for your computer. This information can be observed during a round if the issue which one of the Steam client or Direct X has been provoked. If the number is less than 5 % than the Valve is very good optimised anti-lag settings. At most down to 10 %. A setting of 3 % is very good for a stable frame rate.
