According to a report by The New York Times, at least seven groups are collaborating to fund and coordinate efforts to find ways to thwart Trump's attempts to roll back climate policies. The groups include: the Natural Resources Defense Council, the Southern Environmental Law Center, the Environmental Education Fund, the Union of Concerned Scientists, the League of Conservation Voters, the Environmental Defense Fund, and the Environmental Working Group. The groups have been working to thwart Trump's proposed regressive policies such as withdrawing from the Paris climate agreement, revoking the Clean Power Plan, and proposing a vast reduction in fuel emission standards. The groups are also working to both present resources to frontline communities in the event of a climate disaster and pass on information on climate change to the public. According to the Times, the groups currently have 20 staffers working on these climate change efforts. It also reports that the groups spent over \$1.2 million on lobbying and advocacy efforts to oppose Trump's climate policies last year. It was also mentioned that the sum was a small fraction of the reported \$3 billion spent last year by companies, corporations and individuals to oppose the Obama administration's climate policies. The groups involved, however, all have a strong record of fighting against the fossil fuel industry, especially the coal and oil industries.Q: Need help to find the points z such that the complex number $\sum_{n=0}^{\infty} z^n$ does not have a real part. Any help would be really appreciated. Thanks. A: Consider the sequence $c_n = z^n - z^{n-1} + z^{n-2} - \dots + z + 1$. Then the k th successive differences are of the form $d_k = c_k - c_{k-1} = -z^k$

In the "synchronizing files" step, your browser can either (if you haven't customized it) automatically open a shared folder in Filemaker Pro, or it can do nothing (and you will have to do this manually later). In the synch the files part, you have a choice of making Filemaker Pro use its "remote synchronization" feature to do the synch -- you have to access Filemaker Pro remotely and do the synch there, or you can "synchronize to local files." It can be used to sync work already done on a filemaker Pro file with an Excel file (and vice versa). South Oahu will be a little quieter during the summer months and nights, thanks to the sound of a handful of geese chirping nearby. Read more South Oahu will be a little quieter during the summer months and nights, thanks to the sound of a handful of geese chirping nearby. Construction crews want to add a sleeping "bio-site" to Hawaii Island's largest monastery. As part of that project, Earth Resource Management, Inc., is constructing a series of 10 geese habitats to attract birds to a more natural area, according to spokeswoman Adrienne Minchin. "We found that if we worked a geese behavior study with the landowners in 2015, that they would be willing to let us relocate their geese there," Minchin said. The first habitat is scheduled to be placed Friday on a farm owned by the Assumption Fathers, at the end of the Rainbow Drive turnoff. That farm is part of the Monastery of Our Lady of Atonement, which is owned by the Franciscan priests. According to the company's website, the design includes a half-moon shaped nest box for an adult goose, as well as nest boxes for a juvenile goose, duck or swan. "We're making geese housing," Minchin said. "All we have to do is build a trail and grassland to their nests, and then we're done. We can hang out on the roof and watch them and give them food."
