- Destructoid "Elden Ring is a game that breathes life back into the tactical RPG genre." - RPGSite "The game is a worthy successor to [Square Enix's other tactical RPG Final Fantasy Tactics], a title that managed to achieve the rare feat of offering deep, strategic RPG fun." - Game Front "Elden Ring is the right sequel to [FFT]." - Eurogamer "A sad truth of mecha RPGs is that you're always stuck waiting for the next one to play. Elden Ring amply confirms that I'd like to take a stab at the next game in this series." - Game Informer "Sebastian Bayliss hit on a good visual metaphor describing the experience of exploring the world of Elden Ring, and it's a good way to explain how to play the game. The fantasy setting, surreal imagery, and chaotic battle results are refreshing to the palette, as is the freedom you're given to guide your party as you see fit." - www.gamezebo.com "...Tarnished copies an aesthetic from Ragnarok Odyssey and places it into a fantasy setting, and although it's hard not to compare it to that game, Ragnarok Odyssey is not what it lacks, and it's generally more impressive. Tarnished is a solid tactical RPG that, if you've come looking for tactical gaming, will at the very least give you interesting variety." - IGN "The story and characters aren't as strong as it needs to be, but if you're into historical-themed strategy titles and/or tactical RPGs, you'll probably find a lot to like." - The Escapist "Tarnished is a genuinely surprising game, and with a perfect blend of familiar and new concepts, what's present in the game strikes a pleasant balance." - Hardcore Gamer "Elden Ring has quite possibly the most to offer any type of gamer. While I didn't have the same level of connection with the characters as with [Final Fantasy XIII-2], the story and progression of the game were greatly appreciated." - FGGames.net "...is an adventure, beautifully crafted, brimming with epic yet intimate charms. I got to know the series' protagonist with a desire to give him better and bff6bb2d33

Differential impact of peripheral glucocorticoid receptors deletion on B-cell function in the common variable immunodeficiency mouse. Glucocorticoids (GCs) are important regulators of B-cell development and activity. GC receptors (GRs) are expressed by B cells in humans and mice and modulate B-cell function. We have generated a mouse model deficient for GR expression by B cells (B-GR KO), and we evaluate the impact of GR absence in follicular (FO) and marginal (MF) B cells on GC-mediated functions of these cells. Despite the substantial reduction of GC-mediated anti-CD40-induced proliferation in B-GR KO FO and MF B cells, GC signaling in GC B cells after LPS stimulation was not altered. In addition, GR-deficient MF B cells exhibited normal antigen-driven class switch recombination upon LPS activation, while GC-mediated class switch in FO B cells was impaired. Splenic follicular dendritic cell (FDC) network formation in follicles was impaired in B-GR KO mice, while bone marrow-derived cells retained normal differentiation into FDCs in vitro and in vivo. Collectively, this study reveals that the B-GR KO mouse presents a model for the analysis of GC-mediated functions in B cells and that GRs are dispensable for physiological GC function in B cells.Q: Как удалить точку от названия меток в вопросе?
