ChingLiu.Q: How to migrate a database from SQL Server to Oracle I need to use an sql query in my
program to migrate a database from SQL Server to Oracle. So far, I have found a SQL Server to
Oracle Migration Tool but it seems not really reliable to me. When run my query in the database, it
returns 0 records. I'm working with SQL Server 2008 R2 and Oracle Database 11g Enterprise Edition
Release 11.2.0.1.0. Do you have any idea or have you any recommendation? A: Try this article, it
discusses how to migrate data into Oracle. And, yes, make sure you read the last section where it
mentions you need to use OWD [or other object-level security] when doing this kind of migration.
