window server to another I'm not well versed in Powershell but it's a skill I need to learn. I need to write a script to move files from one windows server to another without having to do any network changes. The script needs to be able to be run on the same network and I think it would be best to have the first few lines of the script be run within a batch file on the server

the files will be moving to. Unfortunately I have not found a script to do this so I am attempting to write my own. I have done some googling and have found a few examples that make this seem possible, but nothing on the way it needs to be done. The part of the script that needs to be changed is the file transfer function. I have modified a few e79caf774b
