WindowShade makes a window partially transparent, so you can have your window visible without losing the control over it. It is very convenient for changing your viewpoint, or for glancing at something without losing control of the window. You can also use it to hide windows that you don't need to see, or roll-up only their titlebars, leaving the rest of the window completely visible and accessible. Try WindowShade now! and come back to compare it in our showcase: Millions of users around the world use Kopine to organize their digital life. Kopine now has a convenient new way to find your files and content easily: Content Search. Using Content Search you can find any file, picture, video, document, web page, calendar appointment, or contact easier than ever. You can even search by text (e.g., phrase, phrase with special symbols such as "@", "#", "%"). To find your files and content faster, with less mouse clicks, and with less typing, Kopine always searches in one simple step using Content Search to make you find your files faster. How is it possible? Content Search uses your existing Kopine account to organize your files and content. You have your own digital file folder - Kopine keeps it in sync with your computer and all its connected devices (e.g., your iPhone, iPad, iPod touch). You have your own account on public web sites (e.g., Dropbox, Google Drive) and other digital services (e.g., Box, OneDrive). You can quickly find your files and content in Kopine without having to remember file names, or path to your specific folders. Content Search will find files and content that you put on the Internet. Kopine will also scan files and content that you put on your devices to make sure that they are in your Kopine account. Kopine will even search all private repositories in your Kopine account. Content Search is fully integrated into the Kopine interface, so you can still use the intuitive operation and features you are used to, and you will never miss a file or content that you have searched and found before. How to use Content Search in Kopine? Content Search has been designed to be easy to use: - When you visit the search page, you simply b7e8fdf5c8

- helps you hide the windows that are obscuring your view temporarily - completely hassle-free and unobtrusive for your eye - just by double-clicking the window title bar, or pressing the Shift or Control key twice, the window will roll into just the window title bar, letting you see and interact with the windows located below the current window - If you want to be able to see all windows at the same time, you can use the WindowShadeAuto position option - ideal for quickly glancing on what's happening below the current window or to get the top window out of the way without losing control of it - by activating it, your window will become partially transparent, so you can see through it while keeping the complete control over its controls and buttons! - WindowShade is a free program with basic functionality, but it also provides many more features. Get started with the help of the manual at - to change the look of the windowsShade title bar double-click its bottom right corner and select the look you like. - the "Windows Shaded" penguin icon and its above description will be always at the corner of the windowsShade title bar. - you can change the position of the penguin icon by selecting one of the pre-defined positions at the left of the title bar - to add or remove the padding between the icon and its own description there is a checkbox and it can be switched on/off. - the WindowShade has been tested in all kinds of windows like in Firefox, in.NET programs and in applications written in Visual C#.2 and above. - the WindowShade is based on the Skia text library and the icon is composed of the Windows standard resources. Features: - Filter all shortcuts from the shell - Hide all taskbar buttons, including the minimize, maximize and close buttons - Selectable positions of the WindowShade title bar penguin - Customizable description - Free to use - Clean and simple user interface that uses little system resources 1.12 Dec 15th 2014 Version 1.12 - the "Windows Shaded" penguin icon and its above description will be always at the corner of the windowsShade title bar. Version 1.11 Oct 7th 2014 Version 1.11 - to

What's New In?

- Makes your computer more transparent: It will give you the ability to use your computer more easily, you will be able to see the bottom windows easier and also you will be able to interact with the windows more easily, such as minimizing, maximizing and giving focus to it.
- It will make your PC look cooler: It will make you feel more relaxed, you can see through your window fully, while your computer background is still visible through the window.
- It will let you see a little more of your desktop: You will be able to see the other windows in the background of your screen.
- It will help you focus on your keyboard: You will focus on your keyboard while you work, you can look at your screen with nothing but your current working space.
- It will let you see what is happening in your background: You will be able to see the desktop windows in your background, making your screen look more clear and beautiful.
- It will let you interact with your desktop: You will be able to interact with the other working spaces in your background, such as minimize, maximize and so on.
- It will save your eyes: It will let you see through your window, while keeping your window fully transparent, this will help you do your work without having to look away frequently.
- It will help you see the control buttons more easily: You will have a good look at the control buttons in your window.
- It will help you minimize the current window more easily: You will be able to move your current window easily, by giving focus to it.
- It will increase your productivity: It will let you do more in less time and with less waste.
- It will save your energy: It will help you to do your work and keep your eyes in a good condition

for a longer time. • It will help you relax: It will decrease the stress and anxiety that you have. • It will put you in a different mindset: It will put you in a relaxed and comfortable way of working. WindowShade lets you hide the windows that are obscuring your view temporarily - completely hassle-free and unobtrusive for your eye. Just by double-clicking the window titlebar, or pressing the Shift or Control key twice, the window will roll into just the window title bar, letting you see and interact with the
