Create and animate various models, with multiple pieces. X-LeoCAD is a model building application, inspired by LEGO. It features easy to use animation, customisation options, physics and also allows for object interaction. It is an application particularly suitable for the creation of complex models like buildings, puzzles, VR and professional animation. It is very easy to work with. For instance, you can easily manipulate the orientation of the pieces. You can even animate the models by simply dragging them. X-LeoCAD Features: Create models by first creating the rigid, and then placing each piece of the model. You can animate models by dragging them, and also set the initial values (speed, rotation,...) to create an animation. The animation process is carried out using the physics engine and allows for easy interaction of objects. Optimize your models by removing unnecessary pieces or, if they are part of a larger model, optimizing the model itself. Manage multiple models, multiple pieces, objects, animations, and history. Apply frames to your model to create an animation by changing the speed of the model pieces. Create and animate various models, with multiple pieces. X-LeoCAD is a 3D Computer Aided Design - Computer Aided drawing - software that allows users to build accurate, digital Lego models. It is a fully dedicated design tool that includes an interface with an intuitive interface that allows you to move, resize and rotate the Lego building pieces around a virtual space and connect them together. It is a powerful 3D CAD - computer aided design - software that allows users to create models and animation of his creations in free and time-saving manner. X-LeoCAD is aimed at users who want to create a Lego model, but has the functionality and characteristics of a CAD - computer aided design - software such as Cadsoft 360 Studio, Solid Edge CAD software or Inventor CATIA SolidWorks. It includes many advanced features for the creation of 2D and 3D models but has a simple design and easy to use software. Key Features:

- Open Architecture: X-LeoCAD is a fully open architecture CAD - computer aided design - software that can be used in the classic way for simple construction or it can also be used as a powerful CAD - computer aided design - software with a variety of advanced features for creation of 2D and 3D models. X-LeoCAD can be used as a standalone application but it can also be used in harmony with other Autodesk or third party CAD - computer aided design - software.
- Content Drag-and-drop: X-LeoCAD has its own unique design and can be used with any other content either it is graphics or image files. X-LeoCAD can be used to create the Lego models, animation or just preview the creation.
- Advanced Polygonal mesh: X-LeoCAD has an advanced Polygonal mesh modelling mode that allows users to create and modify realistic models without having to use any other 3D CAD - computer aided design - software.
- Extreme accuracy: X-LeoCAD includes 2 methods of super accuracy when using the design, through snapping or through intelligent snapping. Snapping allows you to place the model with extreme accuracy and it can handle very large and complicated models. It is possible to drag and drop models from external content management system.
- Drag and Drop
- Clean Design interface: X-LeoCAD has a clean design and it is user friendly interface that allows the user to create professional and realistic results.
- Edit and create geometry: X-Le

Justin Stephens, 20, had accused Martin Riaz, 20, of stealing for £30. After the fight, Mr Riaz went to the home of Mr Stephens's cousin, and Mr Stephens claimed Mr Riaz was a "security threat" and shot him in the buttocks with a warning. He was charged under the Police and Criminal Evidence Act with unlawfully wounding Mr Riaz on 2 July last year. "The evidence I'm reading is given by the crown and the defendant, he gave evidence, he explained how it happened, and all the prosecution have proved is that he brought in the firearm and shot Martin in the buttocks," Judge Francis Sheridan told the jury. 'Slap in the face' Mr Stephens then told the court he had no proof Mr Riaz had stolen the money for him. "I was trying to help him, he had been
