lini I am planning to open source the same thing at my company and I'd be interested in seeing that. I wrote a ruby version of it a couple weeks ago. [ Robotic-assisted surgery in a community hospital. The emergence of robotic technology has changed the landscape of surgery, allowing operators to perform surgery without a long scar, minimal invasiveness, and better visualization. We retrospectively reviewed our first 20 cases of robotically assisted prostatectomy. Pre-, intra-, and postoperative clinical parameters were assessed for patients undergoing robotic prostatectomy. Patient and operative variables were compared to control patients undergoing open or laparoscopic prostatectomy. The mean age of the patients was 61 years, the mean prostate-specific antigen level was 9.0 ng/mL, and the mean operative time was 206 minutes. The mean estimated blood loss was 217 mL, and the mean catheter time was 24 hours. The mean hospital stay was 2.7 days. All patients who underwent the procedure had a positive pathology report. There were no perioperative transfusions, and no patients required conversion to an open procedure. The positive and negative margins

---

were negative in 90% and 10% of patients, respectively. There were no intraoperative complications, and no patients had a positive pathology report from their frozen section. The mean International Prostate Symptom Score decreased from 18.4 before surgery to 5.4 after 6 months, and the mean pad usage decreased from 1.7 to
