Tinysio.me is a side-scrolling music video game for Windows Phone that combines art, music and technology. www.facebook.com/RumkeeSlider Hey, this is one of my best games yet and I'd appreciate if you took the time to play it. Play the rumke. This is "Rumke" an unfinished platformer game I've been working on for around 2 years. It's made on Electron (web engine). It's pretty buggy and rough around the edges but I haven't finished it yet. My very first game I ever made (2015). A simple platformer in 2D. An outtake from my zeno game proposal I made in the past. This is quite a "tiny" game with only 2 levels. It would be quite cool if a lot of people supported it and I received any feedback. ScreenShot: Download link: I hadn't developed a 2D game for a while. This project is built to teach me the basics of 2D game development, although I don't intend to release it. The platform was selected due to its simplicity and having a consistent look and feel. I am not a game developer but I made this game because I was bored. I was just searching for a new platform for my game but then my friend told me about it. I hope you enjoy it. Have fun. Everybody likes touch screens and tablets and smartphones. This game is just for fun and not to be developed further. If you like it, feel free to download the game and rate it. There are no ads inside the game. A bit of free game I made when I started working. It's a platform game/action game inspired by games like "Splatoon". I'm not a game dev but I wanted to practice programming and make a game to. I don't think this is really bad but I know there's a lot of room for improvements. Hey guys, let me know how I am doing and if there is anything you want me to add/add features and so on. I know this is late, but I wanted to release the game while I am still alive. It took me a long time to 6d1f23a050
