The Family and Friends 3 Class Book is an excellent career guide for current and prospective students.Q: Uncaught TypeError: object is not a function Sorry, I don't know if I'm posting the right way. \$(document).ready(function() { \$("#show_nav").click(function() { alert(\$("#nav_wrap").animate({left: "-=200px"}, 1000)); }); }); Uncaught TypeError: object is not a function I have a nav bar in my webpage. I use jQuery by adding a mouseenter on the button 'Show Navigation' and using an alert to say when the animation is complete. There are a lot of js files in the webpage but i've only written above the code where there is the problem. I'm not sure where to start with the problem A: You shouldn't put click in document.ready. That's what ready is for - to wait until the DOM (Document Object Model) is loaded, and not for events. It should be \$("#show_nav").on("click", function() {... A: You can use on instead of click like \$("#show_nav").on("click", function() { alert(\$("#nav_wrap").animate({left: "-=200px"}, 1000)); }); Also, load your script after jQuery (jQuery is loaded in the bottom) EDIT: c6a93da74d
